OPERATIONS PLAN

MISSION NO. 1 FY 1985

UTERIK, RONGELAP, EBeye, MAJURO

I. Background and Purpose

Brookhaven National Laboratory has conducted medical surveillance of Rongelap and Uterik persons who were exposed to fall-out from the 1954 nuclear event, BRAVO. A control group of unexposed persons is also monitored for comparison data. In addition, DOE in 1977, in response to requests from people of Rongelap and Uterik, agreed to supplement the TTPI outer island medical service by providing an expanded health care program in these atolls. These medical visits are made at least twice a year.

The mission will be carried out by the M. V. Liktanur at all locations except Ebeye where the vessel will anchor to provide support as needed to the medical team working on shore.

II. Work to be Performed

- A. Follow-up care of adults with ongoing medical problems identified on past trips.
- B. Complete examinations of adults missed during the Spring 1984 trip. (This includes 6 invitees from the outer islands).
- C. Medical examinations of all children, 15 years of age and under, residing on Uterik and Rongelap Atolls. At Ebeye and Majuro, these examinations will be offered to offspring of the adults on the BNL lists, as time permits.
- D. Dental care for all on Uterik and Rongelap.
- E. Sick call coverage to all on Uterik and Rongelap.
- F. Examination at Ebeye and Majuro of Bikinian children under 15, who lived on Bikini Atoll in the 1970s.
- G. Review and evaluation of individuals referred to the medical team by the Marshall Islands Health Services system.

III. Responsibilities

The Party Chief is Dr. William Adams who will be responsible for all medical aspects of the mission.

Harry Brown, Program Liaison Officer, and William Jackson, Program Liaison Specialist, will serve as Department of Energy representatives and spokesmen in policy matters. In addition, they will provide logistical assistance to BNL as required and deal with U.S. Oceanography on behalf of BNL on all substantive matters.

IV. Logistical Support Requirements

Refer to:

1. William Jackson to Reynold deBrum note and letters dated 8/29/84, 9/17/84, and 9/21/84.
2. PASO Tasking Letter of 9/17/84.
3. William Jackson to Tom Daly letter dated 9/17/84.

V. Liktanur II Schedule

<u>Kwajalein Dates</u>	<u>RMI Dates</u>	
10/6	10/7	Depart for Uterik
10/7	10/8	Arrive at Uterik
10/12	10/13	Depart for Rongelap
10/13	10/14	Arrive at Rongelap
10/17	10/18	Depart for Kwajalein
10/18	10/19	Arrive at Kwajalein
10/20, 10/22-24	10/21, 10/23-25	Lay off shore at Ebeye Pier
10/25	10/26	Depart for Majuro
10/27	10/28	Arrive at Majuro
11/1	11/2	Depart for Kwajalein
11/2	11/3	Arrive at Kwajalein

VII. Itineraries of Personnel (West of Honolulu)^{1/}

^{1/} All travel points west of Honolulu are shown in Kwajalein dates. For REPMAR/Majuro dates add (+) 1 day.

VIII. Costs

Logistics costs (which are not covered under the H&N contract with U.S. Oceanography) are to be charged to BNL Biomedical Program Account No. 94008. In this regard, the DOE Coordinator, Kwajalein, is to carefully review costs as detailed in monthly statements from Global Associates.

IX. Subsistence Charges

All BNL related personnel, except REPMAR employees, will be billed \$15.50 per day by H&N, for subsistence and quarters while living aboard the Liktanur II. The charge for lunch, if taken aboard the DOE vessel at Ebeye or Majuro is \$4.25. Republic of the Marshall Islands Government personnel accompanying the mission will be provided S&Q at no charge to them or their agencies.

X. Reports

The Party Chief is to provide a report on the mission no later than 30 days after completion of the operation to the Director, PASO, with an information copy to the Deputy for Pacific Operations, Office of the Manager, NV. This report should be concise and cover all pertinent information such as adequacy of support and offer any comments or recommendations which will improve future operations.
